

ATTENTION!! Trouble on Rotary Type Starting Air Distributor

—Prepare KIT SPARES in Precaution—

Engine Type:L50•60•70•80MC(E)

There is a number of reports that ships became out of operation by the trouble of rotary type starting air distributor.

The trouble occurs in following sequence:

1. At first, gas leakage occurs at starting valve.
2. The leaked gas flows into starting air distributor through non-return valve.
3. The distributor disk (item 002) corrodes by water and oil in the leaked gas, compromising with compressed starting air.
4. Also the leaked gas presses distributor disk against reversing disk (item 001), which causes constant sticking each other and thereby comes to abrasive wear.

For precaution, we would recommend you to keep a set of spares in "KIT" for emergency as well as for regular replacement during dry-docking.

The KIT SPARE is available from us in pre-assembled kit set so as to eliminate mounting difficulty on board.

For order placing, please specify simply "KIT NO. L007 (DIST)"

No.	Description	名 称	50, 60, 70MC		80MC
			27	27A	34X
	PLATE No. 90703	(L007 KIT)			
001	Reversing disc	逆転盤	1	1	1
* 002	Distributor disc	管制盤	1	1	1
* 003	Closing disc	閉塞盤	1	1	1
* 004	Stop disc	ストッパー	1	1	1
